EGOLUCE

A good outdoor lighting design can increase the **enjoyment** of the environment and the **well-being** of people who live it.

It can also emphasize particular architectural details in order to make the space more appealing.

But outdoor lighting, it's not just about aesthetics, it's mostly about safety. A safe environment is the result of an adequate lighting design that highlights the different architectural elements such as obstacles, stairs and passages.

The **IP** code identifies the degree of protection of the enclosures of electrical devices against the penetration of **solid or liquid** agents.

IP

Ingress
protection

1° number

Solids

The first digit stands for the level of protection against a solid object from a hand to dust.

2° number

Liquids

The second digit stands for the level of protection against pure water from 1mm of rainfall to temporary immersion up to 1m.
